

HARSHITHA A PAI

harshithamanipal03@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | Karnataka, India

PROFESSIONAL SUMMARY

Final-year Computer Science and Design student at VTU (CGPA: 8.8) with 4+ full-stack projects across MERN, Java Spring Boot, and ML. Hackathon finalist (2x), zonal-level design award winner, VKSSP scholar, and citizen scientist under IASC. Core committee member of the Gavel Club. Passionate about building scalable, user-centric applications.

TECHNICAL SKILLS

Languages: Java (OOP), JavaScript (ES6+), Python, C
Frontend: React.js, React Native, HTML5, CSS3
Backend: Spring Boot, REST API Design, Node.js, Express.js
Databases: MongoDB, SQL
Tools & Concepts: Git, Postman, DSA, Agile, OOP, Claude AI

EXPERIENCE

Software Development Intern | *Edutainer (PAT Technologies Pvt Ltd)* 2026

- Developed full-stack applications integrating React.js frontends with scalable Java backends and robust REST APIs.
- Optimized DSA implementations in C and Java, improving efficiency of core application workflows.

Research & Development Intern | *Flashflow Technologies OPC Pvt. Ltd* 2025

- Built 'Neurolift,' a pneumatic exoskeleton using Arduino R4, sEMG signal processing, and custom PAMs — achieving 5 kg lift-assist at 90 PSI.

PROJECTS

Kateryu —Hire-a-Caterer Platform (MERN Stack) | *Personal Project* 2026

Stack: MongoDB, Express.js, React.js, Node.js, JWT

- Building a full-stack catering discovery platform with restaurant listings, menu browsing, and order management; secured with JWT-based auth and RBAC.
- Designed RESTful APIs and MongoDB schemas for users, restaurants, menus, and orders with efficient indexing.

FlowCare — Period Tracking App | *Personal Project* 2025

Stack: React Native, Java, Spring Boot, MongoDB

- Cross-platform mobile app with cycle-prediction logic, dynamic calendar, and push reminders built on a Spring Boot REST backend.

Resume Screening ML App | *Personal Project* 2025

Stack: Python, Scikit-learn, Streamlit

- ML web app classifying resumes as which role is better suited via NLP feature extraction; integrated into a real-time Streamlit interface.

CuePets — Pet Healthcare & Adoption Platform | *Canara Engineering College* 2024–25

Stack: Java, Spring Boot, React.js, REST API, MongoDB

- Full-stack platform for managing 5+ pet profiles, adoption listings, blog, and appointment scheduling using MVC architecture.

EDUCATION

B.E. Computer Science and Design — *VTU, Canara Engineering College, Mangalore* 2022 – Present | CGPA: 8.8

Pre-University (PCM + Biology) — *MGM P.U College, Udupi* 2020 – 2022 | 78%

CERTIFICATIONS

- Google AI Essentials — Coursera, 2025
- MongoDB for Developers — MongoDB University, 2025
- Data Structures Intensive — GeeksForGeeks, 2024-25 (22-week, industry workshops)

ACHIEVEMENTS

- Hackathons:** Reached finals in 2 competitive hackathons, demonstrating ability to build functional products under time pressure.
- Design Awards:** Recognized with zonal-level design awards for outstanding UI/UX contributions.
- Citizen Scientist:** Part of citizen scientist under IASC — To help discover asteroids and name them.
- Scholarship:** An active scholar under VKSSP, receiving scholarship throughout engineering.
- Core Committee:** Active core committee member of Gavel club — conducted activities to help students boost their public speaking skills.
